

Bob Stigsell

Advanced Health and Safety LLC

Bio and Course Description

Bob has been in the environmental field since 1990. After working for a few other environmental companies, he started his own business, Advanced Health & Safety in 2000. Bob is an Affiliate member of WAHI and attends the Madison Chapter meetings as often as he can.

When he's not working, Bob enjoys boating, traveling (last month he vacationed in Iceland), going to restaurants around the country that have been highlighted on the hit TV show, Diners Drive-Ins and Dives, watching his kids play lacrosse (high school and college), Badger and Packers football, exercising and walking. He just completed a walking challenge where he and 5 friends each walked 2021 miles in the year 2021!

For this presentation, Bob will explain:

- what asbestos is
- where it comes from
- where to find it in houses and buildings
- zonalite and vermiculite
- rebate program

He will of course take questions from the attendees and is happy to talk about mold and lead in paint if there is interest and/or questions on those as well.
